Introduction

QTech are delighted to release DATRAN Supervisor version 3.62. DATRAN Supervisor provides an easy to use interface for the complete alarm and system management for the DATRAN VI SCADA system. This release corrects a number of issues plus adds new capabilities.

This release comes with a user friendly Setup Wizard to help simplify installation and will upgrade any existing version of DATRAN Supervisor. Please forward a copy of this document to your IT/IS supervisor.

QTech recommends that all customers with Software Maintenance Agreements (SMA) upgrade to this version of DATRAN Supervisor. The software updates are available to all our SMA holders via the QTech website. Please log on to the members area to download.

The following sections of this document describe the enhancements and the installation prerequisites.

Your feedback on the product and possible future enhancements is always appreciated. Please contact QTech on +64 3 366 3713, or email to techsupport@qtech.co.nz.

Prerequisites for Upgrade

- **Compatibility & Installation**

Please ensure your DATRAN VI system has the latest version software installed, refer to the QTech website for the latest release of DATRAN VI. All instances of DATRAN Supervisor, including terminal servers, need to be upgraded.

- **Software Licensing**

No additional licensing requirements are applicable to existing users. For additional DATRAN Supervisor Client licences, please contact QTech sales at sales@qtech.co.nz.

- **Close Applications**

Before installing it is recommended that you close all applications running on the target machine.

- **PC Reboot**

No rebooting of the target machine is required after the installation.
