Introduction

QTech are delighted to release DATRANVue version 3.16. DATRANVue is a cost effective graphical user interface for the DATRAN VI SCADA System and QTech Irrigation Systems. Users can simply and rapidly produce a graphical and user friendly interface for the monitoring and control of remote systems. This release corrects a number of issues plus adds new capabilities including greater support for irrigation systems.

This release comes with a user friendly Setup Wizard to help simplify installation and will upgrade any existing version of DATRANVue Designer and Runtime.

QTech recommends that all customers with Software Maintenance Agreements (SMA) upgrade to this version of DATRANVue. The software updates are available to all our SMA holders via the QTech website. Please log on to the members area to download.

The following sections of this document describe the enhancements and the installation prerequisites.

Your feedback on the product and possible future enhancements is always appreciated. Please contact QTech on +64 3 366 3713, or email to techsupport@qtech.co.nz.

Prerequisites for Upgrade

- **Backwards Compatibility**

DATRANVue Designer and Runtime are backward compatible with your existing HMI screens created with earlier versions of DATRANVue Designer.

- **Software Licensing**

DATRANVue Runtime is licensed via the concurrent user licensing which is managed by DATRAN TCP Server. No licensing changes are required for this version. If you require additional licenses please contact us. Run the installer and accept the software licencing agreement.

- **Close Applications**

Before installing it is recommended that you close all applications running on the target machine.

- **PC Reboot**

No rebooting of the target machine is required after the installation.
